

Carbon Emissions Report

GHG Protocol-Aligned Estimation

Company: Test Company Ltd

Period: FY 2026

Generated: June 17, 2026

Prepared by: Terrnix Carbon Calculator

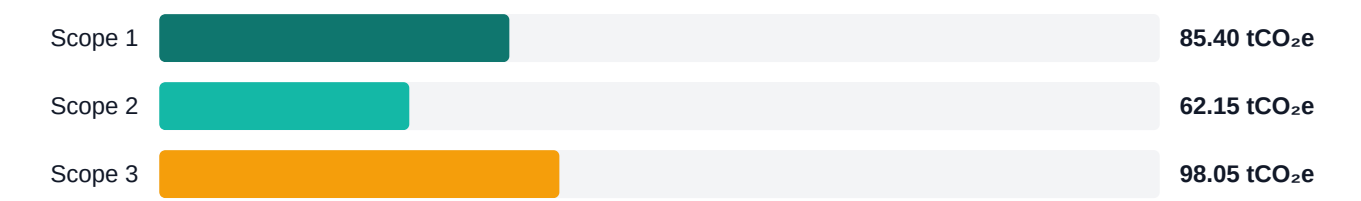

⚠ Unverified Estimate — For informational purposes only

Executive Summary

Total Emissions: 245.60 tCO₂e

This estimate covers Scope 1, 2, and 3 emissions based on data entered into the Terrnix Carbon Calculator.

Emissions Overview

Key Insights

- **Largest source:** Scope 3 (40% of total)
- **Data quality:** Medium — Mix of measured and estimated data. Scope 3 carries higher uncertainty.
- **Coverage:** 8 of 15 Scope 3 categories calculated. 7 categories not included due to data limitations.

Scope 1 — Direct Emissions

Direct greenhouse gas emissions from sources owned or controlled by the organization.

Summary

Source	Emissions (tCO ₂ e)	% of S1
Stationary Combustion	45.20	53%
Mobile Combustion	32.80	38%
Fugitive Emissions	7.40	9%
Total Scope 1	85.40	100%

Details

Stationary Combustion In: 15,000 L F: IPCC 2006 Res: 45.20 tCO₂e
Mobile Combustion In: 25,000 km F: DEFRA 2024 Res: 32.80 tCO₂e

Scope 2 — Indirect Energy

Indirect emissions from purchased electricity, heat, steam, and cooling.

Summary

Method	Emissions (tCO ₂ e)
Location-Based	62.15
Total Scope 2	62.15

Details

Electricity

In: 155,375 kWh | F: IEA 2023

Res: 62.15 tCO₂e

Scope 3 — Value Chain

All other indirect emissions in the value chain, upstream and downstream.

Top Categories

Category	tCO ₂ e	% of S3
Purchased Goods & Services	35.20	36%
Business Travel	28.50	29%
Employee Commuting	18.35	19%

All Categories

#	Category	tCO ₂ e	Quality	Coverage
1	Purchased Goods & Services	35.20	medium	Spend-based estimate
4	Upstream Transportation	12.00	medium	Weight-distance estimate
6	Business Travel	28.50	low-medium	Distance by mode
7	Employee Commuting	18.35	high	Employee survey method

Methodology

Framework

This report follows the **GHG Protocol Corporate Standard** for greenhouse gas accounting and reporting.

Boundaries

- **Organizational:** Operational control approach
- **Reporting:** All material sources within the period
- **Time:** FY 2026

Calculation Approach

Scope	Method	Formula
Scope 1	Activity × Factor	$E = A \times F$
Scope 2	Location-based grid factor	$E = \text{Energy} \times \text{Grid}$
Scope 3	Spend-based or activity-based	$E = A \times \text{EEIO}$

Data Quality

- **High:** Measured data with region-specific factors
- **Medium:** Estimated data with generic factors
- **Low:** Proxy data with high uncertainty

Emission Factors Used

Factors sourced from authoritative databases and updated periodically.

Factor	Value	Unit	Source	Yr	Region
Diesel	2.68	kg CO ₂ /L	IPCC 2006	2024	Global
Electricity Grid	0.40	kg CO ₂ /kWh	IEA 2023	2023	EU Average

Note: Factors are subject to revision. Verify against official national inventories for formal reporting.

Recommendations

Prioritized actions by impact and feasibility:

P1 Supplier Engagement Program Your Scope 3 emissions are the largest source. Work with top suppliers to collect primary emissions data and set reduction targets. Medium	-15% to -25% Scope 3
P2 Renewable Energy Procurement Switch to 100% renewable electricity through green tariffs, PPAs, or on-site generation. Easy	-80% to -100% Scope 2
P3 Fleet Electrification or Fuel Switching Scope 1 direct emissions offer high control. Consider EV transition, biofuels, or efficiency improvements. Hard	-20% to -40% Scope 1

Next Steps: Consider a detailed audit of top emission categories. Terrnix offers deeper analysis and consulting referrals.

Disclaimer & Limitations

Purpose: For informational and educational purposes only. Estimates based on user-entered data.

Not Audit-Ready: Does not constitute a verified GHG inventory. Formal audit required for compliance.

Data Quality: Accuracy depends on input completeness. Scope 3 carries high uncertainty.

Emission Factors: Sourced from EPA, DEFRA, IEA. May not reflect latest values.

Boundaries: Simplified boundaries. Complex structures may not be fully captured.

No Liability: Terrnix accepts no liability for decisions based on this report.

IP: Proprietary to Terrnix. Unauthorized use prohibited.

Reports include an unverified estimate watermark. For audit-ready reports, contact Terrnix.
